The Crime Barriers

A measurably high level of physical security for all commercial & industrial applications.

Keep out burglary and vandalism - let in air and light

GriffinGuard allows store graphics to be seen from behind the glass whilst still protecting it from damage.

The hinge-away option allows the glass to be cleaned and offers an alternative fire escape.

LPS 1175 does not apply.

GriffinGuard does not interfere with the aesthetics of a building.

The only window screen with a corrosion-resis

GRIFFIN GUARD

unobtrusive multi-purpose screen

- Tested and certified by the LPCB to LPS 1175 Security Rating Level 1 for your peace of mind
- Salt spray tests prove that GriffinGuard is less likely to rust than competitive products
- Quick and easy to install
- Less visually intrusive than most security grilles and screens
- May reduce noise and protect against flying objects
- Suitable for most buildings including:
 - Educational establishments
 - Shopping centres
 - Banks
 - Factories
 - Offices
 - Houses
 - Care Homes
 - Hospitals
 - Museums

GriffinGuard has been designed to blend in with the architectural features of a building and is hardly visible from a distance but, up close, it is visible and strong enough to deter burglary and vandalism in order to protect property.

From the inside GriffinGuard allows 60% of available light to enter and allows visibility and airflow through the holes. In fact, GriffinGuard is one of the most unobtrusive forms of window security available.

GriffinGuard can be supplied with a hinge-away option that allows for cleaning of windows or a stand-off option that provides clearance for outward opening windows. The anti-graffiti finish option causes paint to 'bead' off rather than sticking and is supplied with a cleaning kit.

GriffinGuard's unique 3CR12 ferretic stainless steel mesh makes it durable and hard-wearing for the long term. Its high quality aluminium frame ensures that there are no rattles or movement and no fixings visible on the attack surface.

GriffinGuard stand-off option allows windows to be opened.

LPS 1175 does not apply.

The stand-off option combined with the hinge-away.

LPS 1175 does not apply.

tant 3CR12 ferretic stainless steel mesh

Police Preferred
Specification

Designed to ensure security, durability and style

- Intermediate frame
- Countersunk rivet
- Perforated mesh
- Beading
- Outer frame

Technical Details:

Frame:

- Aluminium with snap-on beading that completely covers all fixings on the attack surface
- Available in a wide range of colour options
- Extra firm grip on mesh to prevent rattling
- Easy installation into the reveal or face-on.

Mesh:

- 3CR12 Ferretic stainless steel mesh provides high residual strength and rigidity plus good corrosion resistance (as proven by salt spray tests).
- Whereas the integrity of the corrosion resistance of similar galvanized products is breached by the punching operation, the integrity of the stainless steel remains intact.
- Sizes up to 1300mm X 2500mm in a single piece for optimum rigidity. Pieces can be joined for larger windows.

Lock:

- The hinge-away option may be secured either with a half or full cylinder lock depending on whether key access is required from one or both sides.

Loss Prevention Certification Board

GriffinGuard has been tested and certified by the Loss Prevention Certification Board to LPS 1175 Security Rating Level 1 up to a width of 2500mm.

Police Preferred Specification

Secured By Design

The Association of Chief Police Officers have accepted the product testing on GriffinGuard and approved it as a licensed Secured by Design product.

GriffinGuard frames are available in an attractive stock range of colours (as indicated above), utilizing high quality ultra violet resistant polyester powder coatings suitable for interior and exterior use. Additionally they can be supplied in any standard RAL number and can be matched to decor or corporate identity. Meshes are generally non-reflective matt black for optimum optical illusion. These colours are representative only. For an exact match please call for a swatch.

The Trellicor Security Group, the UK home of Trelidor, Trelidor Plus, Trelidor Trojan, Valudor and GriffinGuard, is based in the West Midlands. We have been a force in the physical barrier security industry since 1976 and we are represented in 40 countries internationally.

All installations are undertaken by trained professionals located throughout the UK.

Tested and certified by the LPCB to LPS 1175 security rating level 1.
