Anti-burglary security grilles

The Crime Barriers

A measurable level of physical security for all domestic commercial & industrial applications.

The perfect balance of style & strength

Sainsburys Greenwich Superstore

Trellidor Plus protects an entrance out of hours ...

... and retracts out of sight during working hours.

The original retractable security grilles from the international market leader

Trellidor Plus:

- **is tested and certified by the LPCB to LPS 1175 Security Rating level 2 for your peace of mind.**
- is a Police Preferred Specification due to its attack testing and certification.
- provides strong, steel physical security to deter and prevent criminals from gaining entry and yet looks light and attractive.
- is available in a number of arrangements and is tailor made and custom fit to suit any door, window or passage opening. Even difficult to secure openings can be accommodated by our design and development team.
- retracts easily as its weight is carried on the top track.
- stacks neatly to one side or both sides of the opening where it can be concealed by curtains.
- has design features to prevent tripping on bottom tracks.
- allows the free flow of air and light but maintains high levels of security at the same time.

Trellidor Plus is a fully framed retractable security grille, which expands to secure the whole of the opening, and is positively restrained along all four edges of the perimeter. When access is required, the grille is unlocked and parted at a point within the span, or at the left or right hand side, according to the configuration. The grille is then retracted into a compact stack on either or both sides of the opening.

The entire range of grilles can be supplied in a retractable or fixed format. Many buildings have apertures that do not need access but still require security. By supplying a fixed grille that matches the retractable grilles for these apertures it is possible to reduce costs and maintain the style of the building.

• Common installations include:

- Airports
- Banks
- Jewellery stores
- Public sector buildings
- Industrial
- Police stations
- Petrol forecourts
- Military installations

Many corporate customers such as Sainsbury's and BP specify only Trellidor Plus security grilles.

Some technical information

- Galvanised steel construction provides greater corrosion resistance.
- Trellidor's patented, award winning Trellilok is one of the strongest locks on the market.
- The top track cover plate makes tampering difficult.
- Fully framed & anchored into the reveal for extra strength.
- Links cross a minimum of three uprights meaning that the door opens and closes uniformly and adds to the integrity.
- Rolled steel uprights enclosing Polymide 6 components.
- Stainless steel lattice link assembly.
- Two point locking from a single key point.

Police Preferred Specification

The Association of Chief Police Officers have accepted the product testing on Trellidor Plus and have approved it as a licenced Secured by Design product.

Trellidor Plus has been certified by the Loss Prevention Certification Board up to a width of 10000 mm. this makes it the only sliding grille to have achieved Level 1 certification to this width. The new approved range in terms of LPS 1175 - Issue 4 is as indicated:

Trellidor Plus grilles are available in an attractive stock range of colours (as indicated above), utilizing high quality ultra violet resistant polyester powder coatings suitable for interior and exterior use. Additionally they can be supplied in any standard RAL number and can be matched to decor or corporate identity. These colours are representative only. For an exact match please call for a swatch.

The Trellidor Security Group, the UK home of Trellidor Economy, Trellidor Standard, Trellidor Plus, Trellidor Trojan and GriffinGuard, is based in the West Midlands. We have been a force in the physical barrier security industry since 1976 and we are represented in 40 countries internationally.

All installations are undertaken by trained professionals located throughout the UK.
